To: ham-equip@ucsd.edu

Ive just got my licence and Im looking for a 2 metre rig.

Ive already got a Icom IC\_P2at but require a base set.

Something cheap at this stage which I can get the following  
local repeaters would be nice

147.1  
147.0  
147.3  
146.75

I live in Wellington, New Zealand  
Thanks

John ZL2xxx (Should get the xxx Monday)

Subject: Aluminum Tower Info Needed  
To: ham-equip@ucsd.edu

I recently obtained a used aluminum tower. The tower consists of eight, 8 foot sections (approx. 60' tower). The widest section is at the base, with each sequential section tapering down, with the narrowest section at the top.

The tower is in quite good condition, with the exception of the top most section, which has several large cracks in the tubing. I would like replace this section, but I do not know who manufactured this tower.... (The previous owner is unreachable.)

Can anyone tell me who manufactures \*\*\* aluminum \*\*\* towers. I don't imagine there that many....

Any help would be greatly appreciated!!!

To: ham-equip@ucsd.edu

I have a Ham-M rotor but no control box for it. Does anyone have a Ham-M Control box available for sale, trade, free, etc. ???

If not, how about a schematic for the control box?

Thanks in advance!

Subject: Swan 700-CX Repair  
To: ham-equip@ucsd.edu

I've had this Swan 700-CX rig for about five years now, but unfortunately I've only been able to use it for two. To make a long story short, my rig decided to fail on me one day and in the process a coil was melted - to say the least. I've looked just about every where for another Swan for parts and even electronics repair shops for this coil - no success. So, I was wondering if anybody out there knows someone who could find the part and repair it or who knows how to wind coils. I have the schematics, so the technical details won't be a problem. Can anyone estimate the value of what is described to me as a National HRO 50T receiver? I haven't seen it yet, and a friend wants to sell one (not to me) and I'd like to be able to give him a fair price range.

Thanks, Bob.

To: ham-equip@ucsd.edu

I've entered the software mod on my W21AT (#+B and turn radio on). Please don't tell me I need to DIAL in a frequency that's way out of the ham band. This is ridiculous. I'll send this radio back to HRO and get a Yeasu!

Thanks in advance and best 73,

Hello!. I am a recent owner of ICOM's HT W21AT. Of course I got  
the user book with my handie, but I'm interested about possible mods on  
this pretty ICOM's thing. Has someone got any information about?.

Thanks in advance :-)-> .
